MOTOR
COATER
ENGINE ENAMEL

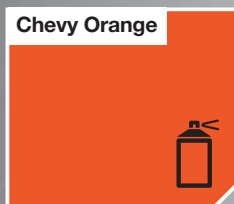

1800 80 90 36
www.kbs-coatings.com.au

MotorCoater is easy to apply by brush or aerosol, offers superb coverage and produces a professional finish. MotorCoater can be applied directly to clean, dry and rust-free metal, over a suitable primer or over well-prepared existing coatings. MotorCoater has high heat resistance (up to 240°C), excellent durability and provides deep, richly pigmented colours with high gloss level – the perfect choice for engine restoration projects.
